Petroleum Refining-Production Planning, Scheduling and Yield Optimisation

Why Choose this Training Course?

Petroleum Refining-Production Planning, Scheduling and Yield Optimization is a combination of two modules specifically designed to run consecutively. Attendees are given a detailed overview of all major refining processes and are familiarized to the most commonly encountered production planning and scheduling issues in petroleum refineries, how to identify them and resolve them.

Additionally, the training course will present a detailed outline of refining process yields optimization, from the crude oil feed to the finished products. Issues of operations scheduling for petroleum refining are discussed in depth and enhanced with planning and scheduling and yield optimization examples.

Who is this Training Course for?

This course is intended for:

- Refining professionals working in the industry either as refining technologists or in refining operations and engineers
- All professionals involved in Production, Planning and Scheduling
- Process engineers and technologists engaged in planning and scheduling activities and who are required to understand and discuss issues related to their industry
- Operations personnel including shift supervisors
- Marketers and refinery planners
- Blending professionals
- Refining Technologists
- Other engineers who would like a further understanding of the complex refining processes
- Accountants, marketers and other professionals who would like understand the complexities and terminology of Production Planning & Scheduling in Petroleum Refineries
- Anyone who wishes to update themselves on the methods used in this important field and learn how to implement error free methods for the benefit of their organizations

What are the Goals?

The key objectives of this comprehensive training course are as follows:

- Gain an appreciation of production planning and scheduling tools that will be useful for planning of crude and product deliveries
- Differentiate and appreciate the similarities and differences between planning and scheduling
- Understand the principles of scheduling optimization and promote efficient refining operations, and yield optimization
- Learn the skills to crude selection and optimization that result in improved profitability
- Develop the skills necessary to apply blending techniques using excel
- To familiarize and understand the various refinery types and appreciate how refining complexity impacts refining optimization and refining margins
- Comprehend the importance quality giveaways and learn how use practical excel spreadsheets for blending calculations to reduce quality giveaways
- Use hands on software that allows professionals in the industry to choose different crude diets to optimize refinery utilization efficiency and profitability
- Act as a primer into the industry of Petroleum Refining and familiarize industry professionals with all processes associated with the processing of petroleum into finished products
- Equip new engineers into the industry, with the basic tools for understanding the complex nature of Refining and its operations

How will this Training Course be Presented?

Petroleum Refining-Production Planning, Scheduling and Yield Optimization is a hands-on, stimulating learning experience. The training course will be highly interactive, with opportunities to advance your opinions and ideas. Participation is encouraged in a supportive environment.

To ensure the concepts introduced during the course are understood, they will be reinforced through a mix of learning methods, including lecture style presentations, open discussions, case studies, and short videos. Hands on computer software and simulations will be provided to illustrate the application of planning and scheduling. The case studies provided for group work will be re-enforced with practical exercises and ample opportunities for deliberation and sharing of experiences.

Attendees will have the opportunity to develop personal competencies and build up expert knowledge of crude oil production planning, scheduling and yield optimization in a range of equipment.
The Course Content

Module 1: Production Planning & Scheduling in Petroleum Refineries

Day 01: Application of Planning and Scheduling
- Overview of planning and scheduling in oil refineries
- Refinery Complexity
- Refinery Configuration
- Integrated Refineries
- Choice of Crude
- Crude oil scheduling
- Capacity utilization of Crudes & Operational Efficiency
- Workshop - Cut-point Optimization

Day 02: Improving Product Movements and Releasing Tankages
- Crude Assay
- Intermediate Feed Characteristics
- Yields and Properties
- Different Process Units
- Storage Tanks
- Custody Transfer/Measurements
- Class Exercises: Using Excel - Yield Optimization

Day 03: Product Blending Rules
- Product Specifications
- New Trends in fuel production
- Environmental Issues
- Crude oil pricing regimes
- Product Netback
- Class Workshop: Blending exercises

Day 04: Refinery Flow Sheets
- Refinery Flow-sheets
- Simplified Material Balance
- Product Inventory Control
- Product Quality Control
- Fixed Composition Blend
- Capacity Control/ Constraints
- Availability of Feedstock/ Control
- Case study: Gasoline Blending and Its Impact on Operations

Day 05: Refinery Planning and Scheduling
- Petroleum Product Movement and Product Exchange
- Marginal Depot Supply and movements
- Crude Selection Strategies
- Linear Programming and Fundamentals of Supply Chain Management for Refining
- Refinery Planning and Scheduling
- Discussion and Summary

The Certificate
- AZTech Certificate of Completion for delegates who attend and complete the training course

visit website: www.aztechtraining.com
Module 2: Refinery Process Yield Optimisation

Day 06: Crude Oil Yields Refinery Technology

- Introduction to Crude Oil Origins & Characteristics
- Crude oil assay and properties
- Crude oil products & product specifications
  - LPG
  - Gasoline
  - Kerosene/ Jet Fuel
  - AGO / Diesel Fuel Oil
  - Petrochemical Feedstocks
- Overall refinery flow: Interrelationship of processes

Day 07: Petroleum Refinery Processes

- Crude Processing
- Desalting
- Atmospheric distillation
- Vacuum distillation
- Heavy Oils Processing / Bottom of the barrel upgrading
  - Coking and Thermal Processes
  - Delayed Coking
  - Fluid Coking
  - Flexicoking
  - Visbreaking
- Case study – example

Day 08: Process for Motor Fuel Production

- Fluid catalytic cracking
- Hydrocracking
- Cat Cracking
- Isomerization
- Alkylation
- Hydrotreating
- Catalytic Reforming
- Case study – example

Day 09: Supporting Operations

- Blending for Product Specifications
- Hydrogen production
- Refinery Gas Plants
- Acid Gas Treating
- Sulfur Recovery Plants
- Utilities
- Case study – example

Day 10: Refinery Economics

- Residue Reduction
- Asphalt and Residual Fuel
- Refinery Complexity and Netback
- Economic Evaluation
- Cost Estimation
- Case Studies
- Group Discussions
- Program Evaluation & Summary

The Structure

This comprehensive training course consists of two modules which can be booked as a 10 Day Training event, or as individual, 5 Day training courses.

- Module 1 - Production Planning & Scheduling in Petroleum Refineries
- Module 2 - Refinery Process Yield Optimisation

This fee is inclusive of Documentation, Lunch and Refreshments

## HOTEL ACCOMMODATION

Hotel accommodation is not included in the Registration Fee. A reduced corporate rate and a limited number of rooms are available for attendees wishing to stay at the hotel venue. Please make your request for accommodation at least 3 weeks prior to the commencement of the course.

## CANCELLATIONS & SUBSTITUTIONS

You must notify the Registrar of cancellations at least 2 weeks before a scheduled seminar in order to be eligible for a credit. If you cannot attend, you may send a replacement from your organisation at no charge. There is a $250 handling charge for all cancellations or rescheduling. We reserve the right to cancel a seminar due to low enrollment. All registrants will be notified in advance and a full refund will be provided upon request.
The Structure

This comprehensive training course consists of two modules which can be booked as a 10 Day Training event, or as individual, 5 Day training courses.

- **Module 1** - Production Planning & Scheduling in Petroleum Refineries
- **Module 2** - Refinery Process Yield Optimisation

EVENT DISCLAIMER

We reserve the right to cancel or postpone a seminar or related event, change venue, substitution of the Instructor at our sole discretion. If this occurs, our responsibility is limited to a refund of any registration fee(s) already paid. We are not responsible for airline tickets, hotels costs, other tickets or payments, or any similar fee penalties or related or unrelated losses, costs and/or expenses registrant may incur or have incurred as a result of any trip cancellations or changes.
