Medium Voltage & High Voltage Switchgear Operations & Maintenance

Effective Maintenance Routine for Electrical Equipment

16 - 20 December 2019
Kuala Lumpur, Malaysia
WHY CHOOSE THIS TRAINING COURSE?

This training course will present a comprehensive capsule of all the knowledge essential for the medium voltage and high voltage switchgear operations and walk the participants through the switchgear design process using a set of interlinked case studies. The training course focuses mainly on the operation and maintenance of distribution equipment namely transformers, circuit breakers, contactors, isolators and disconnectors (this will also include the auxiliary peripherals and control circuits).

Medium and high voltages switchgears are the integral component of any electrical distribution system; hence, the selection and installation of these switchgears are vital so as to provide protection and safe distribution of electrical power. The equipment needs to be operated in a safe manner securing continuity of supply to consumers.

This AZTech training course will feature:

- Understanding the types of medium voltage and high voltage switchgears
- Operation principle of medium voltage circuit breakers
- Identification of the various types of high voltage switchgears
- Maintenance of testing of switchgears
- Construction and operations of high voltage transformers

WHAT ARE THE GOALS?

By the end of this AZTech training course, participants will be able to:

- Understand the role and importance of switchgears
- Determine the components and operations of medium voltage circuit breakers
- Explain the different types of maintenance and testing for switchgears
- Analyse the common faults and short circuit current
- Design and components of high voltage transformers

WHO IS THIS TRAINING COURSE FOR?

This AZTech training course will benefit all levels of professional in an electrical installation. It will enable them to understand operations and maintenance of medium and high voltage circuit breakers and switchgears.

This AZTech training course is suitable to a wide range of technical professionals but will greatly benefit:

- Electricians
- Electrical supervisors
- Plant electricians
- Operations & maintenance engineers, supervisors & technicians
- Maintenance technicians

HOW WILL THIS TRAINING COURSE BE PRESENTED?

This AZTech training course will utilise a variety of proven adult training techniques to ensure maximum understanding, comprehension and retention of the information presented. This includes presentation and discussion of latest videos and technologies on medium and high voltage switchgears.

Questions are encouraged throughout, particularly at the daily wrap up sessions. This provides opportunities for participants to discuss with the Presenter specific issues and, if possible, find appropriate solutions. Specific goals of each participant will be discussed to ensure that their needs are fulfilled whenever practicable.
Day One: The Role and Importance of the Switchgear in Power Systems

- Circuit breakers, auto reclosers, disconnectors and sectionalisers operations
- Earth switches construction and applications
- Switchgear symbols on single-line diagrams
- Substation switchgear layouts
- Types of current situation
- Fault clearing process

Day Two: Sulphur HexaFlouride (SF6) and Vacuum Circuit Breakers

- Compression principles
- SF6 hazards and test equipments
- Dead and Live tank HV circuit breakers
- Operation mechanisms of HV circuit breakers
- Vacuum interrupters operation and maintenance
- Automated circuit breaker monitoring

Day Three: Maintenance and Testing of Switchgears

- Manufacturer testing
- Installation and commissioning
- Documentation requirements
- Importance of maintenance & testing
- Maintenance strategies
- Infrared testing

Day Four: Short Circuit Currents and Calculations and Working Safely

- Introduction to types of relay
- Relay selection, basic concepts and characteristics
- Types of distress and protection modes
- Introduction to safety in HV Substations
- Switchgear numbering and nomenclature
- Switchgear mechanical and electrical interlocking

Day Five: HV Transformer

- HV current transformers construction, operation and maintenance
- HV potential transformers features and operation
- Power transformer construction and operation
- Buchholz relay, pressure relief device
- Protective relay, conservator and breather operating principles
- Maintenance of power transformers
HOTEL ACCOMMODATION
Hotel accommodation is not included in the Registration Fee. A reduced corporate rate and a limited number of rooms are available for attendees wishing to stay at the hotel venue. Please make your request for accommodation at least 3 weeks prior to the commencement of the course.

CANCELLATION & SUBSTITUTION
You must notify the Registrar of cancellations at least 2 weeks before a scheduled seminar in order to be eligible for a credit. If you cannot attend, you may send a replacement from your organisation at no charge. There is a $250 handling charge for all cancellations or rescheduling. We reserve the right to cancel a seminar due to low enrollment. All registrants will be notified in advance and a full refund will be provided upon request.

EVENT DISCLAIMER
We reserve the right to cancel or postpone a seminar or related event, change venue, substitution of the Instructor and alter the course content at our sole discretion. If this occurs, our responsibility is limited to a refund of any registration fee(s) already paid. We are not responsible for airline tickets, hotels costs, other tickets or payments, or any similar fee penalties or related or unrelated losses, costs and/ or expenses registrant may incur or have incurred as a result of any trip cancellations or changes.

MODE OF PAYMENT
PLEASE INVOICE MY COMPANY
PLEASE INVOICE ME
PLEASE FIND ENCLOSED A CHEQUE PAYABLE TO AZTECH
ONLINE / CREDIT CARD
